

## Test Rubric – Point Breakdown:

- Best Practices [ 16 points total possible ]:
  - Validation [ 8 points possible ]:
    - HTML: 2 points possible
      - 2 points = no errors
      - 1 point = 2 or less errors total
      - 0 points: more than 2 errors total
    - CSS: 2 points possible
      - 2 points = no errors
      - 1 point = 2 or less errors total
      - 0 points = more than 2 errors total
    - JavaScript/jQuery: 4 points possible
      - 2 points possible: syntax checking
        - 2 points = no errors in syntax
        - 1 point = 2 or less errors in syntax
        - 0 points = more than 2 errors in syntax
      - 2 point possible: Static Code Analysis
        - 2 point = code does what teacher has defined the JavaScript to look like
        - 1 point = code does what the teacher has defined, but code is not as efficient
        - 0 points = code doesn't do what the teacher has defined the JS to look like
  - Inline CSS & JavaScript [ 4 points possible ]
    - Inline CSS: 2 points possible:
      - 2 points = no inline styling present
      - 0 points = inline styling present
    - Inline JavaScript: 2 points possible:
      - 2 points = no inline JS present
      - 0 points = inline JS present
  - Indentation [ 2 points possible ]
    - 2 points = all files are properly indented and formatted
    - 1 point = up to half of files are not properly formatted
    - 0 points = all files do not consider proper code organization
  - Directory Organization and Formatting [ 2 points possible ]
    - 2 points = all files are properly organized into subfolders defined by their content type (i.e. css is all inside one folder)
    - 1 point = 2 or less files are not within their proper places
    - 0 points = more than 2 files are not where they are supposed to be
- Necessary Files [ ? points total possible ]:
  - For every necessary file that's present and in the proper location, -0 points
  - For every necessary file that's present but not in the correct location, -1 point
  - For every necessary file that's missing, -2 points

- Necessary Elements []
  - Each necessary element indicated is 1 point
  - For every element (i.e. tag, css attribute) that is not present, 1 point is taken off

#### EXAMPLE: TEST CASE 1:

- Best Practices [ 8 points total possible ]:
  - Validation [ 4 points possible ]:
    - HTML: 2 points possible
      - 2 points = no errors
      - 1 point = 2 or less errors total
      - 0 points: more than 2 errors total
    - CSS: 2 points possible
      - 2 points = no errors
      - 1 point = 2 or less errors total
      - 0 points = more than 2 errors total
  - Inline CSS & JavaScript [ 2 points possible ]
    - Inline CSS: 2 points possible:
      - 2 points = no inline styling present
      - 0 points = inline styling present
  - Directory Organization and Formatting [ 2 points possible ]
    - 2 points = all files are properly organized into subfolders defined by their content type (i.e. css is all inside one folder)
    - 1 point = 2 or less files are not within their proper places
    - 0 points = more than 2 files are not where they are supposed to be
- Necessary Files [ 4 points total possible ]:
  - Necessary files:
    - Index.html
    - All.css

Total possible points: 12 points
